

How to Set Up DigieBot

1. Go to  https://digiebot.com/get-started.php?referral_id=21610&commission_plan=1
2. Select the DigieBot trading card for trading credits!!! (\$500 card lasts approximately 3 months)
3. Enroll using all of your real information.
4. Complete your KYC.
5. Click the Trading Platform link to go to the bot trading settings.
6. Enroll for the exchange of your choice: KRAKEN OR BINANCE (INTERNATIONAL)
7. Go to settings then API Key to Sync the API keys from the DigieBot back office to your exchange.
8. Go to auto trade generator and chose your trade settings. You can select to trade usdt or btc or both and you can chose the pairs that you want. If you trade usdt, load your exchange with usdt. If you are trading bitcoin, load bitcoin. I set mine to normal aggression with 5% returns and 2.5% stop losses.
